Annexure-III

GOVERNMENT OF INDIA
MINISTRY OF ELECTRONICS AND INFORMATION TECHNOLOGY
(SOFTWARE INDUSTRY PROMOTION DIVISION)

Subject: Guidelines for Acceleration of Deep Tech startups by Meity with Academia and Industry (ADAMYA)

I. BACKGROUND

The Acceleration of Deep Tech Startups by MeitY with Academia and Industry (ADAMYA) Programme is envisaged as an enabling platform for deep tech startups to undertake research based technology and product development by leveraging the expertise, infrastructure and research capabilities of academia and R&D institutions and Industry.

Deep-technology ventures are characterised by substantial scientific and engineering risk, extended development cycles, significant R&D expenditure, specialised infrastructure requirements and comparatively longer pathways to commercialisation. Such ventures frequently require coordinated access to academic expertise, R&D infrastructure, industry validation, patient capital and Government-supported demand creation.

The Programme shall therefore facilitate structured collaboration among deep-tech startups, academic institutions, R&D organisations, industry, investors, Government Departments, Public Sector Undertakings (PSUs) and State Governments.

The Programme shall focus on accelerating the transition of deep-tech products from research and proof-of-concept stages towards deployable, commercially viable and scalable products.

The Programme shall strengthen India's research-led deep-tech startup ecosystem by enabling collaboration **through selected MeitY-approved deep-tech incubators.**

The Programme shall be implemented by **MeitY Startup Hub (MSH)** through deep-tech incubators, under the overall guidance and oversight of MeitY.

II. OBJECTIVES

The objectives of ADAMYA are:

2.1 Strengthen India's R&D-based Deep Tech Startup ecosystem through academia-industry collaboration and accelerated lab-to-market transition.

2.2 Encourage creation of innovative products based on Intellectual Property.

2.3 Promote comprehensive lifecycle support to deep-tech entrepreneurs across research, development, commercialisation and scaling stages.

2.4 Facilitate access to diverse and patient capital through public-private co-funding models and venture networks.

III. NATURE AND EXTENT OF SUPPORT:

i. **Very Good:** Up to ₹5 Cr project | MeitY support up to ₹2.5 Cr

ii. **Excellent :** Up to ₹10 Cr project | MeitY support up to ₹5 Cr

iii. **Exceptional:** Up to ₹15 Cr project | MeitY support up to ₹7.5 Cr

IV. DEFINITIONS

For the purpose of these Guidelines, unless the context otherwise requires:

4.1 "ADAMYA Programme"

Means the Acceleration of Deep Tech Startups by MeitY with Academia and Industry Programme.

4.2 "Applicant"

Means an eligible entity comprising one of the following, which submits a proposal under the Programme through an onboarded incubator:

i. **Eligible Startup with Researcher/Mentor:** An eligible startup associated with a researcher, scientist, or subject-matter expert from Academia/R&D Institution serving as a mentor or technical advisor for the proposed project.

ii. **Eligible Startup with Researcher/Mentor along with Industry:** An eligible startup associated with a researcher, scientist, or subject-matter expert from Academia/R&D Institution serving as a mentor or technical advisor for the proposed project along with Industry Partner.

iii. **Eligible Startup with Academic Institution:** An eligible startup collaborating with a recognised academic institution/university for research, technology development, validation, testing, or commercialisation of the proposed project. Here academic institutions will assign mentors at a later stage as per requirements.

iv. **Eligible Startup with Research Organisation:** An eligible startup collaborating with a recognised research organisation, laboratory, or R&D institution for research, technology development, testing, validation, or commercialisation of the proposed project.

4.3 "Deep Tech Startup"

'As defined in DPIIT's Notification G.S.R. 108(E) dated 4th Feb 2026.

4.4 "Deep Technology"

Means technology based on substantial scientific or engineering advancement involving significant R&D, technical uncertainty, specialised knowledge, advanced infrastructure or development cycles that create substantial barriers to replication.

4.5 "Incubator"

Means a Section 8 not-for-profit company selected under the Programme for providing incubation, technical, commercial, investment and ecosystem support to participating startups.

4.6 "Implementing Agency"

Means MeitY Startup Hub (MSH) under Digital India Corporation (DIC), unless otherwise specified by MeitY.

4.7 "Academic Institution"

Means a recognised university, IIT, IISc, NIT, research university, educational institution or other eligible academic institution established or recognised under applicable law.

4.8 "R&D Organisation"

May include scientific societies, research laboratories, R&D institutions, CPSEs, SLPEs and other eligible organisations possessing relevant R&D capabilities and infrastructure.

4.9 "Industry Partner"

Means an industrial enterprise, corporate entity, PSU, technology company, manufacturer, user organisation or other eligible entity participating in the Programme.

4.10 "Challenge Statement"

Means a defined technological or product-development problem identified by a Ministry, Department, PSU, State Government or other approved stakeholder, or a sovereign/nationally significant use case recommended by the Expert Committee and approved by MeitY.

4.11 "Project"

Means the approved deep-tech technology/product development programme undertaken by a selected startup.

4.12 "Project Cost"

Means the approved expenditure required for carrying out the sanctioned project, including eligible manpower, R&D, prototyping, equipment, consumables, testing, certification, IP, travel, training and other approved expenditure, including contribution of all stakeholders.

4.13 "Milestone"

Means a defined stage of project execution linked to measurable technical, commercial and financial outputs.

4.14 "Private Contribution"

Means the contribution mobilised from eligible private sources, including industry, CSR, venture capital funds, angel investors, strategic investors, alumni networks and other approved private sources.

4.15 "Government Support"

Means the financial assistance provided under the Programme, comprising grant support and/or investment support.

4.16 "Sovereign Use Case"

Means a technology requirement having strategic, national-security, public-interest, essential-service, technological self-reliance or other nationally significant characteristics, as determined through the Programme framework.

V. BUDGETARY OUTLAY

This programme shall be initiated as a pilot with a total outlay of Rs 95 Cr for 5 years. Based on the experience of this Programme and achievement of targets, the Scheme Management Committee (SMC) shall recommend further expansion of the scope and outlay of this Programme, with necessary approvals.

The government shall support up to 50% of the total project cost, and the remaining shall be co-funded by other stakeholders with support from onboarded incubators and the MSH.

Head	Year 1 (in Cr)	Year 2 (in Cr)	Year 3 (in Cr)	Year 4 (in Cr)	Year 5 (in Cr)	Total (₹ Cr)
A. Startup Support & Grants including Manpower, Consumable, Travel/ Training, Equipment, Overhead, if Any etc	15	17.5	17.5	17.5	17.5	85
B. Administrative charges Including platform charges, Training, Outreach, Promotion & Visibility, Travel, manpower, Personal at Meity	1.1	1.1	1.1	1.1	1.1	5.5
C. Incubators Services & Activities	.90	.90	.90	.90	.90	4.5
Total	**₹17 Cr**	**₹19.5 Cr**	**₹19.5 Cr**	**₹19.5 Cr**	**₹19.5 Cr**	**₹95 Cr**

The Budget shall be provided under three budget heads:

An indicative breakup is to be provided under each head. Once the funds are sanctioned, operational flexibility within Startup Support & Grants (A) or administrative charges (B). However, no reallocation of funds shall be permissible from (A) to (B) or vice-versa.

A. Year-wise Breakup of ₹95 Cr – Startup Support & Grants

Year	Very Good (Up to ₹2.5 Cr)	Excellent (Up to ₹5 Cr)	Exceptional (Up to ₹7.5 Cr)	Total Projects	Yearly Allocation(₹ Cr)
Year 1	2 projects	2 projects	0 project	4	₹15 Cr
Year 2	2 projects	1 project	1 project	4	₹17.5 Cr
Year 3	2 projects	1 project	1 project	4	₹17.5 Cr
Year 4	2 projects	1 project	1 project	4	₹17.5 Cr
Year 5	2 projects	1 project	1 project	4	₹17.5 Cr
Total	10 projects	6 projects	4 projects	20	₹85 Cr

B. Administrative charges (₹ 5.5 Cr)

Category	Y1(₹ Cr)	Y2(₹ Cr)	Y3(₹ Cr)	Y4(₹ Cr)	Y5(₹ Cr)	Total (₹ Cr)
Platform Charges	0.2	0.2	0.2	0.2	0.2	1
Outreach, Promotion & Visibility	0.1	0.15	0.1	0.15	0.1	0.6
Travel	0.1	0.1	0.1	0.1	0.1	0.5
Training (Deep-tech related)	0.2	0.1	0.1	0	0	0.4
Manpower of Implementing Agency	0.28	0.32	0.36	0.4	0.44	1.8
Personal deployed at Meity	0.22	0.23	0.24	0.25	0.26	1.2
Total	1.1	1.1	1.1	1.1	1.1	5.5

2 contractual personnel shall be deployed at MeitY from MSH for providing secretariat support to the Scheme Management Committee (SMC) and inter-ministerial and stakeholder coordination for deep-tech problem statements and challenges, and assisting the division for Deep Tech Domain.

Outreach, Promotion & Visibility include at least one outreach event per year with the help of onboarded incubators.

C. Incubators Services & Activities: A component of Management Fee @ 5% of Startup Support & Grants shall be provisioned for the incubator and disbursed in a stage-wise manner across the project milestones, subject to the prescribed cap for each milestone.

VI. THE PROPOSED FUND FLOW MECHANISM OF ADAMYA SCHEME

As per the approved methodology, the ADAMYA Scheme shall be implemented by MSH through SMC recommended and MeitY approved incubators. The fund flow shall be managed in a manner that ensures timely disbursement, monitoring, utilisation reporting and compliance.

1. Funds shall be released by MeitY to MSH in accordance with the approved scheme provisions and assessed fund requirements.
2. MSH shall release the approved funds to selected incubators after completion of the prescribed approval, due diligence and agreement formalities.

3. Selected incubators shall release the approved funds to beneficiary startups in accordance with the sanctioned milestones and applicable funding conditions.
4. Startups shall submit detailed expenditure reports for each instalment, certified by their finance team or a Chartered Accountant, in the prescribed format in accordance with applicable Government Financial Rules (GFR), reflecting the Government contribution.
5. MSH shall verify proof of transfer of funds from incubators to startups before accepting Utilisation Certificates.
6. MSH shall consolidate utilisation and progress information received from all the incubators and submit consolidated reports and Utilisation Certificates to MeitY, including applicable MSH administrative expenses.
7. The fund-flow mechanism shall be supported through a digital monitoring system for tracking of sanctions, disbursements, utilisation, milestones and outcomes.
8. The MSH will maintain the ADAMYA equity portfolio register, detailing custodian and annual valuation records.

VII. PROGRAMME STRUCTURE

7.1 PRIORITY SECTORS

The Programme shall cover AgriTech, HealthTech, Industry 4.0, Sustainability, Electronics, FinTech, Cybersecurity, Digital Twins, EdTech, GovTech, Enterprise Tech and other emerging deep-tech domains as may be notified by MeitY.

Priority may be accorded to projects addressing critical technology dependencies, strategic technology gaps, nationally significant challenges and sovereign use cases.

The final list of priority sectors may be modified or expanded by MeitY based on technological developments, national priorities and recommendations of the Expert Committee and SMC.

7.2 PROPOSAL ROUTES

The ADAMYA Programme shall operate through two routes for identification of deep-tech challenges.

TRACK A— CHALLENGE TRACK

Startup respond to problem statements from **Ministries | PSUs | Industry | State Departments**

TRACK B — OPEN PROPOSAL

The stakeholders including startups/industry/incubators/VCs/MDOs may propose problem statements addressing nationally significant use cases or sovereign challenges in priority sectors. They will be considered by the Expert Committee for recommendation into Challenge Track and approval of MeitY.

All proposals shall ultimately be processed under the Challenge Track with recommendation of the Expert Committee and approval of MeitY.

7.3. CHALLENGE IDENTIFICATION AND CALL OF PROPOSAL

Challenge statements may be issued by Ministries, PSUs, Industry or States or any sovereign use case in priority sector recommended by Expert Committee and further approved by Meity. The MSH/onboarded incubators shall issue calls through the ADAMYA portal, MeitY portal, MSH portal and partner ecosystem channels. Calls may be cohort-based at six-month intervals or on a rolling basis, depending upon programme requirements and sector priorities.

VIII. ELIGIBILITY CRITERIA

A. Eligibility of Incubators

9. The incubator shall be a registered Section-8 not-for-profit company operating in India and having a valid certificate.
10. The incubator shall have at least three years of experience in incubating technology startups, with demonstrated support to deep-tech ventures.
11. The incubator shall have capability to mentor startups in strategic technology areas such as AI, Semiconductors, Quantum, Cybersecurity, Electronics, IT and other emerging technologies.
12. The incubator shall possess, or have formal access to, incubation infrastructure, laboratories, testing facilities and prototyping resources.
13. The incubator shall have collaborations with academia, R&D organisations, industry partners and domain experts.
14. The incubator shall demonstrate capability to facilitate industry/VC co-funding, IP support, certification and market access.
15. The incubator shall demonstrate capacity to facilitate private funding support for at least 50 startups through technology research, prototype development, commercialisation and scaling.

B. Eligibility of Startups:

16. The startup shall be recognised by DPIIT and shall remain valid at the time of application. If a startup is not registered at the time of application, the incubator may help to register the startup by the time of selection.
17. The startup shall be majority owned (at least 51%) by Indian citizens and/or Indian entities and shall be under the effective control of resident Indian citizens, in accordance with the Companies Act, 2013.

C. Eligibility of Academia /R&D Organisations

18. Eligible academic institutions shall possess valid establishment and registration/accreditation documents from the appropriate government/statutory body.
19. Eligible R&D organisations may include scientific societies, R&D laboratories/institutions, CPSEs, SLPEs and other eligible entities with basic R&D infrastructure.
20. The participating researcher, scientist, or subject-matter shall possess relevant domain expertise and be a regular employee of the academic/R&D Organization.

IX. APPLICATION, EVALUATION, AND SELECTION PROCESS

D. Evaluation of Incubators

21. The MSH shall undertake initial scrutiny against basic eligibility criteria.
22. Shortlisted incubators shall be recommended for presentation before the Expert Committee.
23. The Expert Committee shall assess the incubator's merit, startup scaling parameters, evaluation of Incubator capabilities, infrastructure and support system for startups, incubator network, Team strength and ability to raise private funds, expertise and capacity to promote deep-tech innovation.
24. The weightages for evaluation of incubators and startups will be decided by an Expert committee before opening the applications for selection of the incubators and startups.
25. The Expert Committee shall recommend the eligible incubators for further recommendation by SMC and approval of Meity.

E. Evaluation of Startups

26. Startups responding to approved Challenge Track opportunities shall submit their proposals through onboarded incubators.
27. The MSH/onboarded incubators shall undertake initial scrutiny for eligibility and completeness of startups.
28. Shortlisted startup shall be evaluated by Expert Committee using core evaluation criteria such as Startups Technology Innovation & Novelty, Technology Differentiation & Competitive Advantage, Market Potential & Commercialization, Team Capability & Execution Plan, Business Model & investment readiness, Traction & Partnerships and Societal, Economic & Strategic Impact.

F. Evaluation of Proposals

29. Proposals in challenge track of applicants shall be evaluated by the Expert Committee using the below indicative Research Rubric:

S. No.	Parameter	Indicative Assessment
i	Domain	Alignment with designated deep-tech priority sector and notified challenge.
ii	Research Approach	Innovation and originality of the proposed approach.
iii	Research Potential	Likelihood of reaching advanced technology maturity and commercialisation.
iv	Data Requirement	Justification of datasets, sources, quantity and relevance, where applicable.
v	Current TRL	Assessment of existing technology maturity and development stage.
vi	Future TRL & Growth Potential	Roadmap for advancing technology towards commercial deployment.
vii	Technology Architecture & Scalability	Performance, modularity, optimisation, innovation and scalability.
viii	Delivery & Integration	Deployment approach, industry partnerships and ecosystem integration.

ix	Computational & Infrastructure Need	Compute, cloud, storage and hardware/software requirements.
x	Project Duration	Detailed plan from research through commercialisation.
xi	Cost & Funding Plan	Transparent project cost, funding sources and sustainability.
xii	Team Credentials	Technical expertise, prior prototypes/systems, publications and collaborations.
xiii	Impact & Adoption	Societal, industrial, economic and strategic impact.
xiv	Investment Readiness	Potential to attract VC, industry or other approved external funding.

30. Weightages under the rubric shall be decided by the Expert Committee based on the relevant problem statement and programme requirements.
31. The final list shall be placed before SMC for further recommendation.
32. As a general, one proposal may be selected against each challenge statement. However, the Expert Committee may recommend the selection of multiple proposals (max 3) where parallel technological approaches, complementary solutions, technology diversification, or multiple deployment pathways are considered necessary to effectively address the challenge.
33. The Expert Committee/SMC may determine the maximum number of proposals to be selected against each challenge statement, taking into consideration the complexity and scope of the challenge, funding requirements, strategic importance, technological diversity, and availability of programme funds.
34. The final selection of proposals and provision of financial support shall be subject to the recommendations of the Expert Committee and SMC and the approval of MeitY, in accordance with the applicable programme guidelines, approved objectives, and budgetary provisions.

X. GUIDELINES FOR BUDGET ALLOCATION OF PROJECT:

All Applicants shall submit a detailed project-wise budget along with their proposal. Applicants are advised to adhere to the following guidelines while submitting budgetary requirements for their projects:

35. The budget of Travel expenses should be limited to 5% of the total budget.
36. Overhead costs should not exceed 5% of the total budget.
37. Provide a detailed breakdown of required capital equipment and manpower costs.
38. Include an indicative list of any consumable items needed for the project.
39. Funds under the Startup Support & Grants head can also be utilized for patent filing charges.
40. The startups may explore the feasibility to use capital items from the existing inventory, especially items available from academia/R&D institutions/industry/incubators or infrastructure available in digital portals maintained by MSH on prescribed nominal charges.

XI. DUE DILIGENCE, APPROVAL AND AGREEMENT

41. Agreements, post due diligence shall be executed by MSH with the selected incubators and applicants before formal release of funds.

42. The agreement shall clearly define the project scope, milestones and deliverables, funding structure, IP terms, reporting obligations, correctness of information submitted, compliance requirements, funding conditions and consequences of non-performance.
43. No milestone-wise fund release shall be made without PRSG recommendation, achievement of predefined milestones and confirmation of required contribution from private sources.

XII. FUND FLOW AND DISBURSEMENT OF PROJECT

44. MeitY shall contribute upto 50% of the total approved project cost.
45. The remaining funds shall be financed through private sources, with facilitation by the MSH and onboarded incubators.
46. Funding shall be released on a milestone basis in four instalments, subject to achievement of predefined milestones and approved funds from private sources.
47. The first two instalments shall be provided as grant-in-aid against private sources such as CSR funds, alumni networks, angel investors, industry partners, venture capitalists and other private sources.
48. For the later two instalments, support shall shift to an investment mode, subject to the startup securing external private investment.
49. The selected incubator may hold equity up to 5% on behalf of MSH through Equity Management Service Agreement (EMS) for the overall financial support under the project.
50. Each startup will be supported only once, and the MSH, with the help of incubators, will be responsible for milestone verification, handholding support, and ensuring that appropriate exit strategies are embedded within startup agreements.

XIII. MILESTONE STRUCTURE AND FUNDING CONDITION

Milestone	**Stage-wise Cap**	**INPUT**	**OUTPUT**	**Instrument**	**Government Share**	**Private share of stage**	**Minimum Private share of stage (if no private funding at initial stage)**
M1 – Technology Research	20%	Problem definition and team formation	Design completion and POC demonstration, IP	Grant	Up to 16% of total project cost	4% of total project cost	0%
M2 – Product Development	30%	Design completion and POC demonstration, IP	Product adoption, pilot deployment and third-party certification, if required	Grant	Up to 24% of total project cost	at least 6% of total project cost	at least 6% of total project cost

M3 – Go-to-Market	20%	Product adoption, pilot deployment and third party certification, if required	User satisfaction report	Equity	Up to 6% of total project cost	at least 14% of total project cost	at least 18% of total project cost
M4 – Scaling and Follow-on Funding	30%	User satisfactio n report	Completion of approved project	Equity	Up to 4% of total project cost	at least 26% of total project cost	at least 26% of total project cost
Overall Project	100 %	Completion of approved project milestones		Grant + Equity (Overall Equity by MSH Capped at 5%)	50%	50%	50%

51. A management fee of 5% of Startup Support and Fund shall be provisioned for the incubator and disbursed in prescribed stage-wise cap, subject to the project milestones achieved with approved external private funding.

52. Illustrative Funding Example (Excellent category: Max ₹10 crore project)

The incubator fee shall be 5% of the total Startup Support Fund (Government contribution). For a Government contribution of ₹5 crore, the total incubator fee shall therefore be ₹25 lakhs, which shall be disbursed stage-wise in accordance with the applicable stage-wise caps outlined above.

Milestone	**Stage-wise cap**	**Incubator Fee (Max)**	**Govern ment (Max)**	**Private (Max)**	**Private (if no initial funding)**	**Instrument (Government)**
M1 — Research	₹2.00 cr	₹5 lakhs (20% of ₹25 lakhs)	₹1.60 cr	₹0.40 cr	0	Grant
M2 — Product Development	₹3.00 cr	₹7.5 lakhs (30% of ₹25 lakhs)	₹2.40 cr	₹0.60 cr	₹0.60 cr	Grant
M3 — Go-to-Market	₹2.00 cr	₹5 lakhs (20% of ₹25 lakhs)	₹0.60 cr	₹1.40 cr	₹1.8 cr	Equity
M4 — Scaling and Follow-on- Funding	₹3.00 cr	₹7.5 lakhs (30% of ₹25 lakhs)	₹0.40 cr	₹2.60 cr	₹2.60 cr	Equity
Total	₹10.00 cr	₹25 lakhs	₹5.00 cr (50%)	₹5.00 cr (50%)	₹5.00 cr (50%)	Grant + Equity

53. The maximum duration for developing the product through to commercialization, starting from the sanction date, shall be five years, while the minimum duration shall be two years. It may exceed the recommendation of SMC.
54. Each milestone shall have a minimum duration of six months commencing from the date of execution of the agreement.
55. Milestone-wise exit may be undertaken in case of disputes, subject to applicable recommendation from PRSG and SMC.
56. On successful completion of each milestone, the startup shall submit a detailed report to MSH/PRSG for review before further release of funds.
57. At the end of each project duration, the startup shall submit a final technical and financial report to the MSH.
58. The project shall be deemed successfully completed with the recommendation of PRSG and SMC based on criteria such as commercialization and deployment of deep-tech products, IP generated, mobilization of external private funding and the employment generated by the developed deep tech Product.
59. Incubators shall not charge any fee or take any additional equity for their services provided under the programme, as programme provisions provide financial support to the incubators.
60. Deployment of products developed under ADAMYA programme within government entities shall be commensurate with the extent of government grant provided.
61. A Complaint and Grievance Redressal Cell shall be maintained under the MSH.

XIV. Deliverables and KPI Tracking

62. The ADAMYA Scheme shall track project-level and scheme-level performance through defined outputs and outcomes. MSH shall maintain the KPI status through the digital platform and periodic reports.

Deliverable	Year 1	Year 2	Year 3	Year 4	Year 5	Total
Projects Selected	4	4	4	4	4	20
Patents Filed	0	5	5	5	5	20
Product Launches	0	0	4	8	8	20
Startups with External Funding	0	2	4	5	5	16
Industry Partners Engaged	2	3	5	5	5	20

63. Project-level KPIs shall include, wherever applicable, prototype readiness, third-party certification, pilot deployment, user validation, patent filed, commercialisation progress, external investment mobilised, employment generation, customer acquisition, revenue traction, valuation and market adoption.
64. The long-term impact includes the successful mobilization of external private funding, generation of intellectual property, commercialization and deployment of deep-tech products, revenue generated, customer acquisition, market adoption and the overall outcomes achieved under the scheme.

XV. Governance Structure

65. The Scheme Monitoring Committee (SMC), chaired by Secretary MeitY, shall serve as the apex governance and oversight body for ADAMYA. SMC shall oversee the

Programme, provide strategic guidance and recommend changes/amendments for improvement. Final selection of incubators and proposals under the Challenge Track shall be carried out with recommendation of SMC. SMC shall be authorised to take the final decision for funding under the approved categories.

66. The Project Review & Steering Group (PRSG) constituted by MeitY chaired by Joint Secretary/GC(SIPD), MeitY to review selected project technical and financial progress, and recommend fund release for selected projects based on milestones.
67. A comprehensive monitoring dashboard shall be developed to provide overall tracking and analysis of Programme performance.

XVI. Monitoring and Reporting

68. MSH shall monitor all projects through monthly or quarterly technical and financial reviews and provide a regular quarterly report to MeitY.
69. Each release of funds shall be subject to satisfactory milestone completion and certified expenditure reporting.
70. MSH shall compile KPI status received from onboarded incubators and place consolidated progress before MeitY, PRSG and SMC through periodic reports.
71. Any relaxation from these guidelines shall require prior approval of the SMC.

XVII. Intellectual Property Framework

72. All Intellectual Property generated under the ADAMYA Scheme shall be owned by the startup to facilitate commercialisation, future fundraising, private investment and technology scaling. The IP shall be retained in India.
73. The Government of India, including Ministries, Departments, PSUs, autonomous bodies and other Government-controlled entities, shall be granted a royalty-free, non-exclusive licence to use such IP for non-commercial public purposes, commensurate with the extent of financial assistance provided under the Programme. Commercial exploitation of such IP by a Government entity shall be governed by mutually agreed licensing terms between the concerned Government entity and the startup.
74. Allocation and sharing of IP rights among collaborating entities, including academic institutions, R&D organisations, industry partners and other collaborators, shall be governed by mutually agreed terms and formalised through appropriate agreements.
75. All collaborating entities shall ensure that ownership, licensing, revenue sharing, publication rights, confidentiality obligations and commercialisation responsibilities are clearly defined.

XVIII. Grievance, Exit and Recovery

76. The MSH shall maintain a grievance redressal mechanism for Programme-related complaints.
77. In case of non-compliance, improper utilisation of funds or deviation from approved activities, appropriate recovery and/or legal action may be initiated.
78. The final decision on disputes shall rest with Secretary MeitY.
79. In the event of acquisition or IPO, the MSH may monetise the equity stake, recovering its contribution and any gain.
80. MSH equity holding at exit shall not exceed the prescribed 5% cap.

81. On exit from the start-up as an equity stakeholder, 80% of the net returns on the investment shall be retained by the Implementing Agency, while 20% of the net returns shall be provided additionally to the concerned incubators as an incentive for effective investment management. These returns may be utilized for furtherance of the objective of the ADAMYA programme. If needed, the guidelines may be evolved further based on stakeholder consultations.

XIX. Roles and Responsibilities of Implementing Agency

MSH shall discharge the following responsibilities:

82. Constitute the expert committee with the approval of PRSG to select deep tech-based incubators and to ensure technical, financial, and commercial assessment of DeepTech proposals.
83. Formulate and issue calls for proposals and challenge statements.
84. Undertake due diligence, preliminary scrutiny and shortlisting.
85. Facilitate startup-academia/R&D organisation-industry partnerships and matchmaking.
86. Execute agreements with selected incubators and startups.
87. Disburse funds based on approved milestones and recommendations of PRSG.
88. Facilitate financial and technical industry partnerships with the support of incubators.
89. Develop a digital platform to provide detailed and comprehensive information about the ADAMYA programme. (covered under section 20).
90. Provide real-time updates and periodic reports to MeitY.
91. Facilitate IP, legal, certification and go-to-market support.
92. Coordinate ecosystem collaboration, mentoring and market/investor linkages.

XX. Digital Platform for ADAMYA:

93. The Digital Platform shall serve as the central web portal for the ADAMYA programme, offering detailed and dynamic information to all stakeholders with role based access.
94. The platform streamlines proposal submission and selection through a structured, transparent, and criteria-driven evaluation process leading to timely approvals.
95. It provides comprehensive project insights, including overall milestone tracking, outputs, and outcomes, along with status updates and disbursement details linked to milestones achieved.
96. A built-in data analytics dashboard offers visualizations of programme performance, enabling users to monitor progress and impact effectively.
97. Regular news updates, alerts, and key announcements are published to keep all participants informed and engaged.
98. Provide a public dashboard of the ADAMYA for transparent status for all stakeholders including startups.
99. The platform actively engages ecosystem enablers including subject matter experts, academic institutions, incubators, mentors, accelerators, investors, industry, government agencies, and policy think tanks to deliver holistic support to deep-tech startups.
100. It catalogues available infrastructure from universities, government laboratories, and private innovation centres, allowing startups to request time-bound access to critical R&D resources.
101. It also tracks a wide range of funding opportunities and assists startups in securing advanced-stage funding through alerts, guidance, and matchmaking.

102. A dedicated dashboard monitors key performance indicators of incubators and startups such as financial metrics, revenue growth, sector wise data, success stories, employment generated, intellectual property (IP) and valuations of all funded startups.

XXI. Incubation Services and Activities:

The selected incubators have to provide a range of value-added service to the Start-Ups which include the following:

103. Expert diagnostics for market research, product positioning, and business strategy refinement
104. Sector-specific mentorship delivered by domain experts aligned to the startup's technology vertical
105. Provide intellectual property (IP) and legal facilitation support to participating startups.
106. Access to connected learning and networking platforms, enabling collaboration across the startup ecosystem
107. Investor exposure through Demo Days, facilitating structured interactions with venture capitalists (VCs) and angel investors
108. Investment facilitation support, including guidance on negotiation and closure of funding deals.
109. Access to lab equipment, and technical facilities of incubators on the best support basis.
110. Opportunities for global exposure, partnerships, and market access.
111. Facilitate the startups to secure follow-on funding from investors.
112. Portfolio management and reporting – incubators will have to work closely with the startups during the programme to ensure that the investments are being managed appropriately and the timely reporting of the startup performance is done.
113. Exit Management and reporting – incubators will have to engage with the startups and in the event of an exit they will have to ensure that the investments made by MSH are realized as per the investment terms and that the financial returns and gains be timely reported to MSH.

XXII. Records Management and Documentation

114. All participating startups, incubators, academia and collaborating entities shall maintain detailed records relating to idea development, research, prototype evolution, testing, deployment, expenditure, project milestones, procurement and final outcome. Such records shall be made available for review by MSH or MeitY during the Programme period.
115. Official communication shall ordinarily be undertaken through the registered email ID of the nominated Single Point of Contact (SPOC), who shall serve as the designated point of contact unless changed with approval of the MSH.

XXIII. Responsibility Matrix

Responsibility matrix for MeitY, Implementing Agency, Startup, Academia/R&D Organization, and Industry as per defined Milestone:

Role of MeitY: Design, Lead, Fund, Monitoring and Review of the Programme.

The **Scheme Management Committee (SMC)** chaired by Secretary MeitY shall serve as the apex governance and oversight body for ADAMYA, to oversee all aspects of the programme, and provide strategic guidance and recommend changes/amendments for the improvements of the programme. Personnel deployed at MeitY from MSH shall provide secretariat support to the Scheme Management Committee (SMC) and inter-ministerial and stakeholder coordination for deep-tech problem statements and challenges, and assisting the division for Deep Tech Domain.

MeitY constituted **Project Review & Steering Group (PRSG)** chaired by Joint Secretary/GC(SIPD), MeitY to oversee selected project technical and financial progress, and recommend fund release for selected projects based on milestones.

A digital portal shall be developed and maintained by an implementing agency to provide in-depth tracking and analysis of the scheme's performance. These dashboards will offer dynamic data representation, for tracking of sanctions, disbursements, utilisation, milestones and outcomes. Regular monitoring activities will be conducted by the program division, ensuring that the scheme's progress is continuously assessed and evaluated.

The ADAMYA Programme shall have two proposal routes for identification of deep-tech projects.

TRACK A— CHALLENGE TRACK
Startup respond to problem statements from **Ministries | PSUs | Industry | State Departments**

TRACK B — OPEN PROPOSAL
The stakeholders including startups/industry/incubators/VCs/MDOs may propose problem statements addressing nationally significant use cases or sovereign challenges in priority sectors. They will be considered by the Expert Committee for recommendation into Challenge Track and approval of MeitY.

All proposals shall ultimately be processed under the Challenge Track with recommendation of the Expert Committee and approval of MeitY.

The **Expert Committee**, to be constituted by the Implementing Agency with the approval of PRSG, shall comprise representatives from MeitY, domain experts from industry and academia, representatives from private investor, and investment manager from Public Sector Banks/SIDBI to evaluate the deep tech-based incubators and to ensure technical, financial, and commercial assessment of DeepTech proposals

Milestone	Implementing Agency	Incubator	Startup	Academia / R&D Institution	Industry Partner	Investor
M1 – Technology Research (Grant)	Invite proposals through the portal; evaluate incubators and proposals with the Expert Committee; undertake due diligence; execute agreements with incubators and startups; release approved grants; monitor milestone progress; coordinate with Government agencies with support from MeitY.	Identify and onboard deep-tech ventures; mobilise initial private contribution through CSR, angel or alumni networks; provide incubation and sector-specific mentoring.	Develop PoC/prototype; undertake approved research activities; file/protect IP; utilise funds for approved purposes; submit milestone reports. Maintain proper books of accounts and project records.	Undertake applied research; provide laboratories, scientific expertise, technology guidance and validation support.	Define problem statements; provide domain knowledge, infrastructure and pilot opportunities; support early-stage co-funding through CSR, wherever feasible.	Support early-stage co-funding through VCs, angel investors or strategic grants, wherever feasible; provide market inputs.
M2 – Product Development (Grant)	Review milestone achievement; process fund release; monitor project implementation; facilitate third-party certification and pilot deployment through Government agencies with support from MeitY.	Support product development, certification, IP and regulatory compliance; facilitate market validation and mobilisation of private contribution.	Develop MVP/product; complete pilot deployment; obtain third-party certifications; file/protect IP; prepare for commercialisation.	Support product engineering, testing, validation, certification and technology transfer.	Facilitate pilot deployment, user validation, product refinement and industrial feedback.	Participate in technical and commercial reviews; undertake investment due diligence and assess investment readiness.

M3 – Go-to-Market (Equity)	Execute Equity Management Service(EMS) Agreement; make approved Government investment; manage Government equity capped at 5%; monitor portfolio performance.	Support investment and portfolio management; facilitate investor engagement through Demo Days; support compliance and periodic reporting.	Launch product commercially; acquire customers; raise external investment; achieve agreed commercial milestones.	Continue technical support for product optimisation and IP strengthening.	Facilitate customer acquisition, strategic partnerships and commercial adoption; act as lead/co-investor, wherever applicable; participate in governance, where applicable.	Act as lead/co-investor, wherever applicable; invest alongside Government; undertake commercial due diligence; provide strategic guidance and participate in governance, where applicable.
M4 – Scaling and Follow on Funding (Equity)	Monitor investment performance; oversee exit strategy, wherever applicable; ensure recovery/realisation of Government investment in accordance with approved terms.	Facilitate follow-on funding, business expansion, portfolio monitoring and exit management, wherever applicable.	Scale operations; increase revenue; expand markets; raise follow-on funding.	Support advanced R&D, product enhancement and next-generation innovation.	Support manufacturing, supply chain, market expansion and commercialisation; facilitate follow-on opportunities.	Provide follow-on investment and strategic capital; provide board-level guidance, where applicable; facilitate global market access and support acquisition/IPO/exit opportunities, wherever applicable.

116. These Guidelines are intended to provide the operational framework for implementation of the Programme and shall be read together with the approval of the competent authority and such supplementary guidelines, instructions and amendments as may be issued by MeitY from time to time

INDICATIVE APPLICATION FORM

A. Applicant Startup

1. Name of Startup
2. Date of Incorporation
3. CIN
4. DPIIT Recognition Number
5. Registered Office
6. Corporate Office
7. Website
8. CEO
9. Contact Details
10. Founders/Promoters
11. Shareholding Pattern
12. Board Composition
13. Indian Ownership and Control
14. Existing Funding if any
15. Audited Financial Statements
16. Existing Investors if any
17. Existing Government Support if any

B. Partnerships if any

1. Academic Partner /R&D Institute Partner
2. Industry Partner
3. Government/User Department
4. Investor/Private Funding Partner
5. Roles and Responsibilities of Each Partner

C. Technology

1. Technology Description
2. Technology Novelty
3. Technology Differentiation
4. Current TRL
5. Target TRL
6. Technology Architecture
7. Research and development methodology
8. IP Position if any
9. Patents if any
10. Publications/Research if any
11. Technology Dependencies
12. Critical Components
13. Indigenous Content

D. Project

1. Problem Statement
2. Proposed Solution
3. Research Methodology
4. Project Objectives
5. Milestones
6. Deliverables
7. Project Duration
8. Risk Analysis
9. Testing and Certification Plan
10. Pilot Deployment Plan
11. Commercialisation Plan

E. Financials

1. Total Project Cost
2. Government Support Requested
3. Private Contribution
4. Milestone-linked utilisation plan
5. Manpower Cost
6. Equipment Cost
7. Consumables
8. R&D Cost
9. Testing/Certification
10. IP Cost
11. Travel
12. Overheads
13. Other Costs

F. Commercialisation

1. Target User/ Customers
2. Market Size
3. Business Model
4. Pricing
5. Revenue Projection
6. Customer Pipeline
7. Pilot Customers
8. Follow-on Funding Plan
9. Manufacturing/Deployment Plan
10. Export Potential

The implementing agency may to add/modify the aforesaid parameter of application form as per requirements recorded in writing.
